

HOLIDAY PARK PRECINCTS:

ENTRY AND CENTRAL FACILITIES PRECINCT:
 The entry and central facilities precinct will provide infrastructure and resources for park management and maintenance and key facilities for guests. The overall character of the precinct will be oriented towards fulfilling the needs of the park's tourist clientele and establishing an ambience that is characteristic of a coastal holiday destination.

TOURIST SITE AND ACCOMMODATION PRECINCT:
 The aim for this precinct is to support sites, accommodation and facilities for tourists and in the long term for all sites in the precinct to be available for tourist use. This will be achieved by progressively making existing short term sites available for tourist use. The design for the precinct will make provision for powered tourist sites for tents, caravans and recreational vehicles

LONG TERM CASUAL PRECINCT:
 These parts of the park will continue to support a mix of long term sites and short term sites for tourists and holiday vans. Where sites become available and it is appropriate, holiday vans will be relocated from the other precincts.
